

GAME TIME! – STUDENT INSTRUCTIONS

Prop Game

Student Instructions:

- 1) The teacher will pick a prop related to the theme and have two actors come to the stage and perform a scene using the prop – but using it as something else! The teacher can help the students set up a scene or students can create the scene on their own. For example, a student might use a plain-old rock as a precious gem from the planet Mish-Mash; or the actors may select a wooden spoon, pretending it is gear shifter that fell off their space ship. The scenes should be short and students can participate more than once as time allows.
